The [Hampton Coffee Co.](#) has opened its third store out East.

The 19-year-old coffee company has opened a cafe and espresso bar in Southampton, joining the business's other locations in Water Mill and Westhampton Beach.

The new 5,000-square-foot location is modeled after West Coast-style espresso bars, and features a Pour Over Bar, in which customers sit a specially designed counter with a personal barista to choose the type of coffee they want and method of brewing. The coffee is then made fresh-to-order.

"What I'm really excited about is that our new Hampton Coffee Co. Experience Store has an education room where we can hold coffee-related seminars," Coffee Experience Manager Richard Cummins said. "We are looking forward to being able to introduce our customers to the farmers from around the world from whom we buy our green coffee beans. Our first will be from Sumatra, Indonesia. We buy all our Sumatra coffee direct-trade from his family."

The new Southampton location, a former Mini Cooper car dealership, is located next to the BMW dealership on Highway County Road 39A. It features a retro-industrial décor with an urban, modern ambiance, black walls with stainless steel accents, and earthy touches like custom-made reclaimed wood tables, company co-owner Theresa Belkin said.

"Although all our locations are located in a suburb of New York City, specialty coffee is actually still very new to our area," co-owner Jason Belkin said. "We were the first micro-roastery in our entire region back in 1994, so for our newest concept we wanted to once again be at the forefront of specialty coffee in our area and bring a top-notch coffee experience out here to the Hamptons."
